

**Math Weekly Problem Competition**

**Friday, November 1, 2013**

Is it possible to place 2013 different positive integers around a circle so that for every consecutive pair, the ratio of the larger to the smaller is a prime?

**Join the competition!**

The Department of Applied Mathematics and IIT SIAM Student Chapter is organizing a weekly campus-wide math competition for undergraduate students.

- ▷ Every Friday 3pm, visit <http://math.iit.edu/~weeklyproblem> to view the problem of the week
- ▷ Submit the solution to [weeklyproblem@math.iit.edu](mailto:weeklyproblem@math.iit.edu) by Wednesday 5pm
- ▷ The author(s) of the first correct solution(s) will receive a monetary prize

For more details view the official web site <http://math.iit.edu/~weeklyproblem>.

Become a Math Club member and receive the problem by email.

Good Luck! Have fun and enjoy Mathematics!
